

Laitty

Laitty is one of my script faces that was designed at the same time as Elementa Script. Once the development was stopped when 2/3 of the alphabet had been completed in 1993, I began it again in Summer of 1997. I wanted to add some feminine and fancy mood on, to this typeface, I filled inside of characters' closed spaces. Before, I had tried to fill the characters' insides, and I guess this result made their looks cute. There is no version without fillings.
